JANUARY 1984

EDITORIAL

With the coming of the New Year comes the obvious realization that the old one has passed. It is a time of mixed feeling, some sad and some happy depending on ones point of view or the individual taking it. I for one refuse to be saddened by the mere passage of time. True, my allotted moments are that many fewer but I still have an indeterminate number left. What is important is what was done and what remains to be done. Our committee has accomplished much in 1983. Somethings we intended to do were not done as were things that needed to be done. No need here for sadness, though, all of us worked hard and moved a long way toward the ultimate goal of properly recording the history of our great organization.

Actually we will never finish. This is as it should be, for the obvious reason that completion means the end, and to write the ending of history implies the ending of an organization. Civil Air Patrol is a long way from ending and so are we.

Let's look upon the New Year as a time of happiness. Rejoice in the thought that we accomplished many things but even more in the thought that there are many more to be done to glorify our organization.

Les

ABOUT THE COVER

Coastal Patrol crew debriefing. The Sergeant wears a standard U.S. Army field jacket with red shoulder straps, and red background CAP chevrons. This was over a khaki shirt and trousers, and with a khaki overseas cap, piped in red. The Lieutenant wears the same khaki uniform but substitutes the A-11 Flight Jacket, which was leather. His jacket also has red covered shoulder straps and the second style "National Patch", with the letters US included. Over his flight jacket, he wears a Mae West life preserver, which was usually yellow for greater visibility. Both men wore standard brown Army shoes or ankle high boots.

HISTORY REGULATION APPROVED

On December 9, 1983, the National Executive Committee approved our proposed regulation regarding historical activities within the Civil Air Patrol. Officially titled "HISTORICAL DATA AND PROPERTIES REGULATION FOR CIVIL AIR PATROL HISTORIANS", it will be issued as Civil Air Patrol Regulation 210-1 in the not too distant future. This is essentially the regulation which was distributed in Las Vegas. In fact, staff comments, including the Air University Historian, were very favorable, hence no changes were made. As you will recall, the regulation calls for the appointment of a Historian at the National, Regional, and Wing levels.

On the National Level I am pleased to announce that the NEC appointed the writer as the National Historian. In accordance with the proposed regulation, I will remain as the Chairman of the National Historical committee. Paragraph 1-2C specifies that the National Historian is assigned primary responsibility for the Civil Air Patrol Historical Program (CAP/HP) and that the National Historical Committee will

remain the primary implementing agency. Literally translated this states that we continue to function as we have over the past three years. The primary advantage of having a National Historian lies in the rather nebulous area of better acceptance by other organizations, since they can relate to a historians title more readily than a chairmans.

More important though is the requirement for the appointment of Historians at Region and Wing Level and for the production of an annual Wing History. It now becomes our responsibility to convert words to deeds. Many activities must take place prior to our history program being a fact. Position descriptions and Level II specialty track information is in the hands of the Senior Training people. Here too, it is essentially the material we discussed in Las Vegas. Specialty track number 220 has been assigned to the position of Historians and includes the requirements for technician, senior and master grades. Once the regulation and training material has been distributed, Region and Wing Commanders will be requested to designate their respective Historians. As I see it, the guidance and training of these newly appointed Historians becomes our responsibility. Time schedule is such that our goals call for these appointments to be made prior to 1 June 1984. Informal advice indicates that the training material and regulation will be distributed no later than 1 March 1984. All of this would indicate that we're on track as pertains to our established goals. It further indicates that we should plan for some type of training to occur at our 1984 meeting in Atlanta. (More about this later)

Another big item covered by the regulation is the requirement for the submission of annual Regional and Wing histories no later than 31 July of the succeeding year. Here too, there is no "magic wand". Rather, it falls our lot to provide the guidance necessary to guide the production of these historians in such a manner as to not place an unwanted burden on the field. Taking a reasonable approach it would appear that some wings will be in a position to produce some form of history for calendar year 1984 with most being able to do so for 1985. To facilitate this matter I have asked Hellenmerie to chair a subcommittee for the preparation of a "fill in the blanks" annual history outline for use by Wings. With this, I would like to appoint the two other incumbent Wing Historians, Lib and Lee to this subcommittee. I'm sure that Hellenmerie would appreciate any input any of you may have. Ideally, the output of this sub-committee should be available for presentation in Atlanta.

NATIONAL BOARD MEETING

Exact details of time and place are not at my fingertips. It suffices to say that it will be held in Atlanta, Georgia in early August 1984. It is not too early to start our planning. As I see it, we must run some type of training on the new program. Additionally I think it a good idea for us to come out of the closet and put on some type of display. The display idea is primarily intended to stimulate interest by the general membership. What is needed here is a volunteer to coordinate it and sufficient volunteers to man it when we're in session. Anyone care to step forward? Also needed are suggestions from each of you as regards what we should do. Of equal importance is each of us planning to attend and to dedicate as much time as is possible to Historical Activities while we're there. Let me hear!

HISTORIAL COMMITTEE GOES MECHANIZED

No, none of us went out and bought tanks. Some of us, Louisa in particular did go out and buy a computer to mechanize our historical activities. At present time Louisa is using an IBM-PC with a Peachtree software package to mechanize her accumulation of appointment dates of National, Regional and Wing officers and commanders. As I understand it, Axel is mechanizing the regulation indices so that we will have a checklist of all issues of regulations, manuals and pamphlets. I personally, with the help of a very dedicated young CAP son-in-law am working on mechanized projects

involving; the Duck Club, Air Medals and Wartime Special Orders. As regards the Duck Club, attached is my latest print out. Numerous blanks exist as well as the possibility of some members not being listed. Anyone having any information to help me "fill in the blanks", please provide.

RECORDS ACCUMULATION

The most singular event of this phase of our operation was the delivery of three linear feet of our archives to the Albert F. Simpson Historical Research Center (AFSHRC). This was accomplished during my recent visit to Maxwell. When fully assimilated into their holdings this material will be indexed in the 270 series. With only slight modifications, this topic index of the AFSHRC Decimal System will be adopted for use within CAP for Historical Holdings. Instructions regarding its use are currently being prepared. The text portion of these instructions are attached for your information. When completed, the indexing system will be published in the form of a research guide.

At the same time that the original material was placed at AFSHRC a copy was placed in a locked file cabinet at Headquarters. Mark Marsh has the key and will provide you with access to the material should you visit headquarters. As information, attached is a list of material delivered to both locations. While on the subject of indexing, attached are items 7, 34-42 and 204 for your "Compilation of Indices"

CAP IN WORD AND SONG

Allan reports good progress on his accumulation in this area with numerous acquisitions. Attached is the music for previously offered recording of C.A.P. on the Go. Additionally, Allan has been able to get the previously published C.A.P. March re-cored and is in the process of making copies of his master tape.

Speaking of Allan, for some reason the by line to his recent feature in the "CAP NEWS" headlined "The Pair Waited Nervously To Meet the President" got lost in the shuffle. He did a fine job in telling the Sharp-Edwards story.

GOALS

As can be seen by examination of the attached goals Status Report a few are falling behind but for the most part we are accomplishing what we set out to.

TOPIC INDEXING

There are many methods available for indexing collections of books and papers. Most familiar of course are the Dewey Decimal System used in many libraries and the Adjutant General's Decimal System used for War Department files. Very similar to these systems is the Decimal System which is used at the Albert F. Simpson Historical Research Center (AFSHRC). Considering that this institution will be the primary depository for Civil Air Patrol documents it follows that the AFSHRC system should be used within the CAP Historical Program.

In the AFSHRC Decimal System, blocks of three-digit numbers are allocated to classes of organizations grouped by general functions or geographical functions during World War II. The various organizations in each class are assigned specific numbers from the block allocated for the class and subordinate units are given numbers within a sub-block of numbers reserved for larger organizations of each class. In the case of Civil Air Patrol the organizational number of 270 has been assigned. Further subdivision of this unit designator to Region or Wing Level is not practical, hence all documents pertaining to Civil Air Patrol should utilize the above referred to organizational number of 270.

A standard schedule of decimal numbers has been provided for classifying various types of documents. The decimal .01, for instance, is assigned to organizational histories, .193 to general orders and .194 to special orders. Classification of a document of a particular organization is accomplished by combining the three-digit organizational number with the appropriate decimal describing the document. Thus, a file containing Civil Air Patrol Special Orders would be classified as 270.194. This standard schedule of decimal numbers will be utilized with minor exceptions to more closely identify types of documents not normally encountered in the Air Force. These exceptions will be identified from time to time as the situation demands and will be included in future issues of this publication identified by a plus (+) sign in the left margin. For simplicity of use many decimal numbers have been eliminated from this publication. They represent files which are encountered in the Air Force but not within CAP ie .381 Enemy Reaction by Mission.

It should be noted that no attempt has been made to re-codify to account for organizational title changes. Equivalent Director Titles should utilize their predecessor's designation ie .301 -- .319 DC/S (Deputy Chief of Staff/Operation) should be utilized for documents relating to the Director of Operations.

THE C. A. P. IS ON THE GO

(The Civil Air Patrol March)

Arr. by FLOYD E. WERLE,
Chief Arranger, U.S. Air Force Band
3rd Eb Horn

Lyric by ROBERT MILLS
Music by JOSEF MYROW

Marcia, ben marcato

Musical score for 3rd Eb Horn. The score consists of 11 staves of music. It begins with a treble clef, a key signature of one sharp (F#), and a time signature of 8/8. The tempo/mood is 'Marcia, ben marcato'. The dynamics range from *ff* (fortissimo) to *fff* (fortississimo). The score includes various musical notations such as eighth notes, quarter notes, and rests. There are also some numerical markings like '1', '2', '3', '4', '5', '6', '7' which likely refer to measures or specific musical elements.
